Knowledge Check

1

In the equation of a straight-line Y = mX + c, the term m is the:

- A. Slope
- B. Independent variable
- C. Dependent variable
- D. Intercept

1

In the equation of a straight-line Y = mX + c, the term m is the:

- A. Slope
- B. Independent variable
- C. Dependent variable
- D. Intercept

The correct answer is **A**.

In the equation of a straight line Y = mX + c, m represents the slope, and c is any constant.

2

The standard error of the estimate is a measure of:

- A. Explained variation
- B. Variation around the regression line
- C. Variation of the X variable
- D. Total variation of the Y variable

2

The standard error of the estimate is a measure of:

- A. Explained variation
- B. Variation around the regression line
- C. Variation of the X variable
- D. Total variation of the Y variable

The correct answer is **B**.

The standard error of the estimate is a measure of the variation around the regression line.
